

Technology modernization for engineering and legal firms.

A plan first. Then the technology.

HOW WE ENGAGE

Steps 1 and 2 are free. No contract to sign, no commitment. You sign only if you choose a build.

1 • FREE • NO CONTRACT Roadmap We learn how your work gets done and deliver a written plan you keep.	2 • FREE • NO CONTRACT Prototype A working version of a high-value starting point, built in 1–2 days and yours to keep.	3 • FIXED PRICE Build A finished, tested tool your team can rely on every day.	4 • OPTIONAL Support, if needed We're here for updates and fixes whenever you need us.

WHAT WE DO

Underson Associates helps engineering, utility consulting and legal firms modernize the spreadsheets, systems, data and workflows behind their expertise. We start with a detailed roadmap and a working prototype, both free, so firms see a clear plan and a working solution before they commit to anything.

CORE CAPABILITIES

- **Technology modernization roadmaps:** current-state assessment, maturity scorecard, and a phased plan with costs and expected return.
- **Workflow and spreadsheet automation:** turning manual, error-prone spreadsheets into reliable tools with automatic checks and alerts.
- **Custom tools and dashboards:** purpose-built applications for models, studies, budgets and reporting.
- **Compliance and deadline tracking:** evidence checks, audit preparation, and deadline monitoring with automatic reports.
- **Data, documents and integration:** searchable archives, standard templates, and connected timekeeping, billing and project systems.
- **Responsible adoption of new tools:** using AI and other new tools only where they truly help, backed by clear policies for data and use.
- **Training and ongoing support:** rollout, documentation, hosting and continuous improvement.

WHY UNDERSON

- **A plan, not hype.** Every recommendation names the problem, the hours saved and the cost.
- **Proof before commitment.** A working prototype before any contract.
- **Fixed-scope pricing.** Clear deliverables, no surprise invoices.
- **Honest about fit.** We recommend existing software or your own team when that's the better answer.
- **Serving firms across Georgia.** Based in Atlanta, meeting in person or remotely anywhere in the state.

INDUSTRIES SERVED

Engineering & utility consulting

Rates and regulatory, NERC compliance, transmission and system planning, design and field work

Legal

Law firms and in-house legal teams: intake, deadlines, document assembly, billing review

Professional services

Firms where expertise is the product and time is the constraint
